A popular social media conspiracy theory about a recent cluster of hantavirus cases claims... | Harm: 1.3 Misinformation / information hazard harm

A popular social media conspiracy theory about a recent cluster of hantavirus cases claims that the word "hanta" means "scam," "fraud," or "nonsense" in "Hebrew slang." That's more or less where the theory ends and dark suggestion takes over. One is meant to conclude that the supposed Hebrew origins of the word mean that the [...]. One is meant to conclude that the supposed Hebrew origins of the word mean that the hantavirus—a well-documented illness with outbreaks that go back several decades—is somehow a scam, perpetrated by either the Israeli government or some other undefined group of Jewish people. None of this is true.
